

QuickBox™

QuickBox Improves Packaging Flow

Quick and easy to close

- QuickBox closes in a single motion.
- Packer comfort is improved because repetitive-motion stress is reduced.

Improves efficiency

- The closure panel remains rigid and upright allowing reliable label application at any point in the packaging flow.
- No flaps to hang-up on the conveyer line.

Increases throughput

- QuickBox can increase throughput 30% on a packaging line.

A New and Better Corrugated Box

QuickBox is a Superior Box

Tamper resistant

- Reduces pilferage because its closed corners prevent reaching inside the box.

Better product protection

- Product inside a QuickBox is better protected because closed corners produce a stronger box.

Higher recycle content

- QuickBox is a stronger box and can be made with more recycled material without losing strength.

QuickBox Fits into Any Packaging Line

Competitive with RSCs

- QuickBox sizes, prices, and availability are comparable to RSCs.

No capital investment

- QuickBox works with industry-standard case erectors and case sealers.
- No investment in new equipment or changes to your packaging operation.

QuickBox closure panel is unslotted and continuous.

QuickBox works with industry-standard case sealers.

UP TO 30%
INCREASED THROUGHPUT
ON A PACKAGING LINE

QuickBox is tamper resistant when closed and sealed.

QuickBox flats produced in a standard rotary die.
